X626

A microscopic view of a biological specimen, likely a hexapod collembola, showing its segmented body and appendages. The specimen is light-colored and translucent, set against a dark, brownish background. The image is framed by a dark border on the left and top, with a red vertical bar on the left containing the text 'HEXAPODA-COLEMBOLA' and a black box at the bottom left containing 'X626'. The top of the image has a header with three colored boxes: light green, light blue, and light orange, with text 'Mine de Tourves (83)' and 'Bernard Lips' below them.
